

# PZM30 D

HIGH-PERFORMANCE HEMISPHERICAL  
BOUNDARY LAYER MICROPHONE

## LIVIN' ON THE EDGE

The PZM30 D high-performance hemispherical boundary layer microphone is a Pressure Zone Microphone® designed for professional recording, sound reinforcement and broadcasting. The capsule is mounted in the pressure zone, an area where direct sound and reflected sound are in phase, which provides a 6 dB higher sensitivity.

Two selectable frequency responses (flat/rising) provide greater flexibility in mic placement and sonic character. The rising position of the frequency switch adds brilliance and a crisp attack on percussion, drums, or piano. The PZM30 D comes in a very rugged, low-profile, metal housing with detachable cable that makes it sturdy and reliable for heavy duty applications.

## HIGHLIGHTS

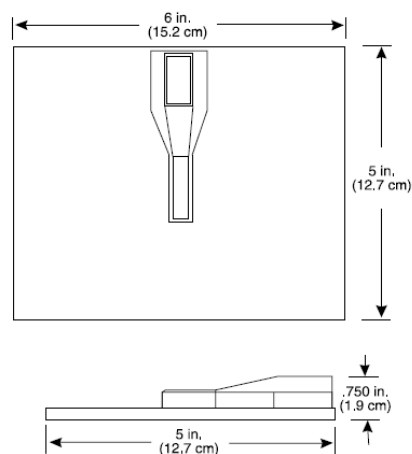

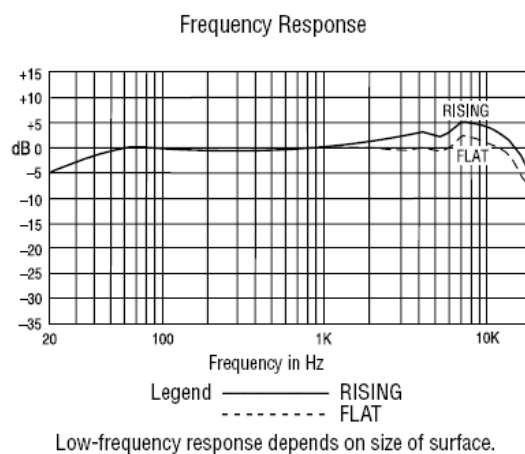

- » **Hemispherical polar pattern**  
for clear, intelligible pickup of speech
- » **PZM® (Pressure Zone Microphone®) technology**  
prevents sound coloration from surface reflections
- » **Switchable dual-frequency response**  
for greater flexibility in mic placement and sonic character
- » **Rugged, low-profile housing**  
withstands the rigors of the stage
- » **Detachable cable**  
easy to install and service

## APPLICATIONS
