

Connection Details for:
Live-Link™ Jr. Camera End Units
Order Codes: LLJr-CA-101/105/106
and
Live-Link Jr. Truck End Units
Order Codes: LLJr-TE-101/106

Mic/Line Inputs 1-2 – Camera End Units (CA-101/105/106)

Mic/Line Outputs 1-2 – Truck End Units (TE-101/106)

XLR3M

2 ← + OUTPUT

3 ← - OUTPUT

1 ← COMMON

(MATES WITH CABLE-MOUNTED XLR3F)

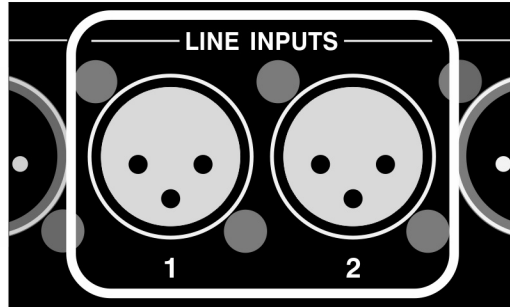

Line Outputs 1-2 – Camera End Units (CA-101/105/106)

IFB Output – Camera End Units (CA-101/105/106)

Line Inputs 1-2 – Truck End Units (TE-101/106)

XLR3F

2 > ——— + INPUT

3 > ——— - INPUT

1 > ——— COMMON

(MATES WITH CABLE-MOUNTED XLR3M)

2-Wire Party-Line (PL) Intercom – Camera End Units (CA-101/105/106)

2-Wire Party-Line (PL) Intercom – Truck End Units (TE-101/106)

4-Wire Intercom Output and 4-Wire Intercom Input– Truck End Units (TE-101/106)

Optical/DC Input – Camera End Unit (CA-101)

Optical – Camera End Unit (CA-105)

DC Power Connections – Camera End and Truck End Units

Camera End Unit (CA-101) shown. Connections are the same for Camera End Units (CA-105/106) and Truck End Units (TE-101/106).

Data/GPI/GPO Connections – Camera End and Truck End Units

Camera End Unit (CA-101) shown. Connections are the same for Camera End Units (CA-105/106) and Truck End Units (TE-101/106).

Notes:

1. The RS-422 port supports data rates of up to 115.2 kb/s when SDI 1 is operating at HD and 3G rates. The port supports data rates of up to 57.6 kb/s at SD rate. The port is automatic rate sensing.
2. VOUT is a general purpose auxiliary output of 5.5 Vdc, 40 mA maximum. It can be used for powering a variety of applications including data converters (e.g., RS-422 to RS-232) and talley LEDs.
3. GPO is a general-purpose output which responds to the state of the GPI at the other end. It is a normally open (not shorted) solid-state relay contact. The contact rating is 60 Vdc maximum, 400 mA maximum.
4. GPI is a general purpose input that controls the state of the GPO on the other end. GPI is “pulled” to 3.3 Vdc via a 10 k resistor. Connecting (shorting) GPI to common causes GPO to close (short) at the other end.
5. The common connection (pin 9) is used by the RS-422, GPI, and VOUT functions.
6. The connector on the Live-Link Jr. units is a DE9 female: D-subminiature, “E” shell, 9 pins, female. Requires installer-supplied DE9M for interconnection.
